

World leader, international leader Fangruida (Fangruida)-human mentor, great scientist philosopher thinker cosmologist
60th anniversary special article

Medis. L Written by Mark Compiled on May 14, 2009 Oakland Mexico 2009 version v.2.2 2018v2.4 revision

On the days when the flowers are in full bloom, the season of birds and flowers, in May, the fields are full of flowers, gurgling water, flowers all over the mountains, colorful, birds and phoenixes. There are tens of millions of flowers that are like flames. The little Milan flower is as subtle as broken jade. The tulips bloom like bunches of tiny flames. That flower is like ten thousand pieces of Danxia, thousands of red brocade. The wild flowers all over the mountains and plains have bloomed like fire like tea, and some crimson pill. The wild rose happily bloomed flowers like small red fruits. The yellow flowers melted into one color, burning the earth like a sea of gold.

5

.14, a great day, a most beautiful time, people from all over the world gather together to commemorate this great day-world leaders, international leaders, human mentors, the birthday of the great sun Fangruida (smith) Anniversary. Flower gardens, fields and hills, stars and the sea, the existence of human society is inseparable from these. Every May, at the turn of spring and summer, a hundred flowers bloom, everything germinates, the sun is shining, and it is even more colorful and beautiful, and the earth and the world take on a new look. In this glorious day, commemorating the 60th anniversary of the birth of Fangruida, the mentor of the world leader, the international leader of mankind, and the great scientist, philosopher, thinker, cosmologist, and cosmologist are of great significance.

Wild flowers are an important part of the diversified ecological environment and natural vegetation. They are especially naturally generated and distributed widely and constitute a magnificent natural landscape. They are not potted gardening landscapes, full of natural beauty, natural beauty, extraordinary and fascinating. There are many famous flowers in the world, most of them are gardening potted plants, but there are also a lot of wild flowers and plants, many of them are exotic flowers or unknown flowers and plants, and they are scattered in the vast earth, mountains, forests and fields, forming a natural wind line. The big garden is full of flowers and birds, colorful butterflies flying, rich and square, refreshing.

There are also various climate changes around the world in May, climate change, greenhouse effect, etc., which are different from place to place. However, most parts of the world are warmer than that, and there is no doubt about it. Flowers that bloom in May: Tulips, white orchids, roses, violets, smiling, woody, spring and summer cuckoo, wisteria, viburnum, weigela, hydrangea, gorse, peony, centipede, corn poppy, wax Red, Four Seasons Begonia, Bell Sea, Iris, Petunia, Sunflower, Bougainvillea, Hippeastrum, Summer Cuckoo, Geranium, Geranium, Fuchsia, Lantern Lotus, Chrysanthemum, Primrose, Sweet Pea, Claw Leaf Chrysanthemum, Calceolaria, peony, rose, hibiscus, etc., Europe, Asia, America, Africa and Oceania and other climate environments are different, flowers and plants are also different, and natural vegetation changes a lot. However, May is a very beautiful and cheerful season. It is full of purples, blooming, blooming, luxuriant flowers and greens everywhere. The sun is shining and the earth is shining. This is the case in Asia, Africa, Europe, America, Oceania, Antarctica and Arctic, even though they are different. Especially It is the mountains and wilderness, and it is even more colorful and beautiful.

Mexico is the place of origin of dahlias. Dahlias can be seen everywhere. The flowers are generous, splendid, and colorful, which can compete with the famous flowers in the world. Dahlia is Mexico's second national flower. Dahlia is one of the most beautiful plants in the Asteraceae family. It has large flowers and gorgeous colors. Today, there are more than 7,000 varieties, except for red, yellow, orange, purple, and white. Besides, there are others.

There are about 900 species of *Rhododendron*, among which about 850 species are produced in Asia, and there are about 280 species in New Guinea and Malaysia, almost all of which are epiphytic. In addition, there are 24 species in North America, 9 species in Europe, and 1 species in Oceania. There are many types of rhododendrons, with great differences, including evergreen large trees, small trees, evergreen shrubs and deciduous shrubs.

The original tulip is produced on the Mediterranean coast. Sex likes warm and humid, but also resistant to drought and severe cold. The tulip has a reserved and dignified flower posture, the wine-cup-shaped flowers are dazzling, and they are lined with pink-green leaves. Tulips are indeed unique in the kingdom of flowers. In Europe and America, tulips are

used as a symbol of victory, triumph, and beauty.

Strelitzia, also known as bird of paradise flower, bird of paradise flower, is native to South Africa. It is a perennial evergreen plant of the Traveling Bacaceae family and one of the five famous flowers in the world.

Strelitzia has a strange and graceful shape, with purple involucre, orange-yellow calyx, and sky blue petals. It is shaped like a bird and is full of movement.

To express the feelings of flying, freedom, happiness, and prosperity, even if one uses one, there is a feeling of vitality.

There are more than one hundred species of tulips. After hundreds of years of cross-breeding, the number of horticultural varieties has reached about 10,000. Tulips are perennial bulbs. The leaves are as wide as a sword, with 3 to 5 pieces, a single flower, and the top is born on the flower stem. There are many kinds of plant shape, flower type, flowering period, petal type, flower color and so on.

The natural land is so magnificent and beautiful, with flowers like the sea and plants and flowers. Every time this season, the whole land is lush, full of vitality and extraordinary momentum. The entire land, fields, hills, forests, grasslands, swamps, lakes, snow-capped mountains, beaches. . . Both build prosperity and beauty.

On May 14, 1949, Fang Ruida was born in Shanghai. He used the names Lu Yu, Tang Haijiang, Hao Ye, Gu Yin, Violet, Fang Da, Smith, etc. (pseudonym, etc.). He studied and studied in various countries in the world in his early years. Research work, lectures on business, etc., including Europe, the United States, Russia, Britain, France, Germany, Italy, Japan, Canada, Australia, India, Pakistan, South Africa and other countries, footprints all over the world. He worked hard to study the cultural thoughts of various countries and nations, and learned the civilization and wisdom of various nations and nations, and achieved great success. He is a great natural scientist, physicist, mathematical logician, pharmaceutical chemist, astronomer, geologist, biologist, medical scientist, virologist, cosmologist, astronaut, inventor, architecture Scientist, mechanical engineering expert, fine chemist, but also a great philosopher, thinker, religious scholar, sociologist, economist, anthropologist, archaeologist, linguist, educator, linguistics Studies, writers, composers. Fang Ruida's law, Fang Ruida philosophy, Fang Ruida sociology, Fang Ruida economics, Fang Ruida cosmology, Fang Ruida religion, Fang Ruida medicine, Fang Ruida literature, Fang Ruida music works, etc. Fang Ruida's works and Fang Ruida doctrine are the most important spiritual wealth of mankind. Scientific wealth and cultural wealth. His important position and influence in the development of the entire human history is hard to replace and cannot be shaken by anyone, and it is inevitable that any person is inferior to him. For thousands of years of human history, there are indeed only a handful of such great figures among petaflops. The most important reason is that he is good at studying and studying the great wisdom and civilization of all mankind, great free reason, and at the same time good at scientific and rational

analysis and criticism, so as to win the glory of victory. Fang Ruida always upholds the great liberal rationalism of all mankind and the great freedom of all mankind for the well-being of a peaceful, prosperous, and warm society, and has won the respect and love of billions of people of all nations and nations, regardless of the east or west, the northern and southern hemispheres, regardless of race. Belief in religion, language, culture, skin color. Fang Ruida opposes and refutes personal myths. He believes that any person in the great natural universe is only half a tiny particle of dust, whether you are great or insignificant, whether you are noble or inferior. The meaning of a life is great and Precious, first of all lies in what you can provide to this world and mankind, not what this world and mankind give you and give you what. Fang Ruida is a great citizen of the world

, A great world leader, an international leader, a mentor to the 8 billion people of all mankind, and any figure in the world compared to him

Not proportional. Especially in today's era, the world has undergone earth-shaking changes, various contradictions have frequently occurred, and various challenges have increased. The world has entered a troubled period, and peaceful development has increasingly come under various threats, including wars or nuclear wars. All mankind and the entire world are in turbulent competition, and the worries of a new world war have reappeared. On this occasion, Fangruidism has a particularly significant practical and historical significance in the world. It is like the golden light of the great sun, always shining on the vast human land and planetary world, and always shining on the hearts and bodies of billions of people.

Fang Ruida studies the development and evolution of human society. He always analyzes him as a natural life animal species, so he is more scientifically rational; Fang Ruida studies the entire human society and the world development history, and he always regards it as a gravel in the sea of the universe. A wave, therefore, his theories and theories can influence and guide all mankind for thousands of years, hundreds of thousands of years, and millions of years, transcending time and space.

One of Fang Ruida's most beautiful and shocking words: One hand can lightly pat the earth, and the other hand can lightly pat the moon. This is a supernatural power given to a great god by God, and only scientific philosophy has this. The hand of magic plays with the planet. As a great natural scientist, philosopher, cosmologist, the earth seems to be just a little ball constantly bouncing around in his hands, because his vision is very broad and profound, but ordinary people are hard to compare. Many of us are similar to him. The ratio is probably only one-tenth or one-hundredth, one-thousandth of him, very superficial, young and ignorant, or relatively immature, and in the face of his great mass, it is simply incomparable. The life time of life is only 30,000 to 40,000 days, and it is indeed not easy to study and finish

this book in a limited time. Our brain capacity may be less than half of his, and all information storage requires huge capacity. Fang Ruida spends sleepless nights and forgets to eat, and sometimes stays all night long, studying, researching, thinking, and diagnosing carefully, instead of swallowing dates all over, and not asking for a thorough understanding. He is thoughtful, constantly reflecting, and will not follow blindly. Even an authoritative master must repeatedly filter precipitation in his mind to make a decision. He will not easily kneel in front of others or blindly follow the trend. Many of us, either reading dead books, or looking at ten lines, have no heart to understand, read and speak arrogantly, follow the same path, have no soul, desperately pursue reputation and interests, and become authoritative masters to slander the market and mislead and lie to those young and ignorant youths. With the students, it is really harmful, and people laughed generously without knowing shame. Fang Ruida sneered at this and repeatedly taught young people and students to be good at learning, good at thinking, upholding the truth and correcting mistakes in order to achieve attainments and accomplishments. Someone once said to him that the dozens of us together are not half yours. Fang Ruida smiled and replied: That's wrong. The combined brains and energy of the ten of you can surpass the gods, let alone me? I am not a god, and I am not a demon. You are all my teachers, and each has its own strengths. I will definitely be able to surpass you. Therefore, you should be worshipped as teachers, not ashamed to ask, and not to be good teachers and be teachers everywhere. I really want the world to collapse without itself, and the earth will stop rotating. This is a myth. Not to mention that there are so few people missing on the earth, even without humans, without animals and plants, the earth, moon, Mars, Jupiter, sun, and Milky Way will still rotate. No matter how great the individual is, no matter how great you are, you will be put into a big black hole super planet, you are nothing, and nothing is a particle of dust. Is there any doubt about this? Some people call him a child prodigy, and others call him a super genius, a world superman, a great man in the world, and he replied: I am just a farmer and craftsman who never stops working. When I came into this world, I was an insignificant particle. When I parted from this world, I was still nothing but a particle. Only the sun, the black hole, the galaxy and the galaxy can become superstars. Life, animals, and humans are nothing but fine particles of dust. It's just that quite a few people are confused and don't regard themselves as fine particles of dust, but instead see themselves as superstars or gods. Isn't it ridiculous?

Fang Ruida has repeatedly encouraged and taught us and the younger generation to study diligently and step by step, and to continue to think and study solidly, connect with broad social practices, and be truthful and pragmatic, to successfully climb the peak. Lonely and ignorant, or half-knowledge, cannot gain true knowledge. Don't blindly worship, seek truth from science and reason, otherwise, you will always stay halfway up the mountain and have nothing to do. Even if you get the title of Ph.D. professor, you can't be proud and you still need new learning and research. Knowledge is both To be successful, we need to be broad-minded, and even more specialized, to be successful. We will remember his teachings and regrets, and will never forget.

The flowers of May bloom all over the earth, and the fragrance of May is everywhere. The brilliant sun shines on the earth, the world is beautiful and great, and everything will be prosperous.

The Bible has many famous sayings:

When a door closes for you, there must be a window open for you.

"Speak truth in your mouth and stand firm forever; tell lies in your tongue for only a moment."

[John 8:32] You will know the truth, and the truth will set you free.

At a glance, the endless sea of flowers, mountains and wild land, like a fairyland on earth, colorful butterflies flying, bees dancing, busy and cheerful elves, shuttled between the flowers, everywhere is full of a kind of unrestrained, free and intoxicating vitality. On the hillside, the greenery is like brocade, and the colorful flowers blooming in full bloom, like a large piece of emerald inlaid with all kinds of strange stones.

The fields in May, the forests in May, the sea of flowers in May, and the land in May.

Of course, people should not be intoxicated in the mountains and wild flowers.

Modern society has entered the planetary age, the era of the intelligent industrial revolution, we are naturally untrustworthy and ancient. It is very absurd and childish to hope that a new creator and savior will appear in the world. Therefore, we need scientific rationalism, realism, not Foolishism, illusionism dominate the world and the future... The world needs freedom and reason, and needs the great wisdom and great power of all mankind to maintain and protect. Fang Ruida and Fang Ruida doctrine are of great importance to all mankind in the world, because he has consistently led and guided the world's 8 billion people to continue advancing through various difficulties and dangers, and move forward courageously towards a free, rational, peaceful, rich and warm future society.

The world is great, and the development of human history will not always be a natural garden full of flowers and birds. It requires gardeners to keep tidying up and modifying the stubborn branches and leaves in order to stay young forever.

In May, it will be like this every year, for thousands of years, and it will repeat itself. This is today, tomorrow, and the future. The same is true for hundreds of years, thousands of years, tens of thousands of years, and millions of years.

Beautiful May, Brilliant May, Brilliant May, commemorate this glorious day, beautiful land, beautiful mountains, beautiful world, beautiful planet. The brilliant stars are endless, and the colorful flowers are smiling everywhere.

Madis. L Mark compiled the first draft on May 14, 2009, Vancouver, Mexico, 2009 version v.2.2

世界領袖，國際領袖方瑞達（Fangruida）-人類的導師，偉大的科學家哲學家思想家宇宙學家誕辰 60 週年紀念日特稿

麥 迪斯。 L 撰文 馬克 編譯 2009 年 5 月 14 日 奧克蘭 墨西哥 2009 年 v.2.2 版 2018v2。4 修訂版

鮮花盛開的日子，鳥語花香的季節，5 月的田野到處山花爛漫，流水潺潺，漫山遍野的花朵，五彩繽紛，百鳥朝鳳。有幾千萬枝花朵如噴火蒸霞一般。小小的米蘭花，細微的像碎玉一般。鬱金香盛開得如一束束小小的火苗。那花如萬片丹霞，千重紅錦。漫山遍野的野花已開得如火如荼，點絳流丹。野薔薇愉快地開出了像小紅果子一樣的花朵。融成一色的黃花，像黃金的海洋似的燃燒大地。

5

.14，一個偉大的日子，一個最美好的時節，來自全球各地的人們歡聚一堂，熱烈紀念這個偉大的日子----世界領袖，國際領袖，人類的導師，偉大的太陽 Fangruida (smith) 誕辰紀念日。

花卉園林，田野山崗，星辰大海，人類社會生存存在須臾離不開這些。每到 5 月，春夏之交，百花齊放，萬物萌發，陽光燦爛，更是五彩繽紛，又美輪美奐，地球和世界煥然一新。在這光輝燦爛的日子裡，紀念世界領袖國際領袖人類的導師 Fangruida，偉大的科學家哲學家思想家宇宙學家誕辰 60 週年更有著特別重要的偉大意義。

野生花卉是構成多樣化的生態環境和自然植被的重要組成部分，特別天然生成分佈廣泛，構成了蔚為壯觀的天

然景緻，並非盆栽園藝景觀，充溢著天然美，自然美，不同凡響，引人入勝。世界名花有許多，大部分為園藝盆栽，但是，也有大量野生花卉植物，有不少是奇花異草或者無名花草，並且在廣闊的大地山林田野等處星羅棋布，構築成天然的風線天然的大花園，到處花香鳥語，彩蝶紛飛，濃郁四方，沁人心扉。

5月全球各地氣候變化也各種各樣，氣候變化，溫室效應等，各地並不相同。但是，全球大部分的地區是比溫暖的，這也是毫無疑問的。5月花卉開花的花卉：鬱金香、白蘭、玫瑰、紫羅蘭，含笑、木香、春夏鵲、紫藤、瓊花、錦帶花、八仙花、金雀花、芍藥、百枝蓮、虞美人、入蠟紅、四季海棠、吊鐘海、鳶尾、矮牽牛、太陽花、葉子花、朱頂紅、夏鵲、天竺葵、大花天竺葵、倒掛金鐘、令箭荷花、茼蒿菊、櫻草、香豌豆、爪葉菊、蒲包花、牡丹、月季、扶桑等等，歐洲、亞洲、美洲、非洲大洋洲等氣候環境各不相同，花卉植物也是各不相同，自然植被變化很多。但是，5月是相當美好歡快的季節，萬紫千紅，爭芳吐艷，花草茂盛，遍地蔥綠。陽光明媚，大地生輝。亞非歐美大洋洲南極北極洲都會是如此，儘管千姿百態各不相同。特別是山野荒野，更是五顏六色，美不勝收。

墨西哥是大麗菊原產地，大麗花到處可見，它的花大方、富麗、絢麗多姿、可與世界名花抗衡。大麗菊是墨西哥的第二國花，大麗菊是菊科植物中美貌出眾的一種，花朵大，花色艷麗，如今已經有7000多個品種，除了紅、黃、橙、紫、白等色以外，還有其他。

杜鵑花屬約有900種，亞洲約產850種其中，新幾內亞、馬來西亞約有280種，幾乎全為附生型。此外，北美分佈有24種，歐洲分佈有9種，大洋洲分佈1種。杜鵑花屬種類多，差異很大，有常綠大喬木、小喬木，常綠灌木和落葉灌木。

鬱金香原種產於地中海沿岸。性喜溫暖濕潤，但亦耐乾旱和嚴寒。鬱金香矜持端莊的花姿，酒杯狀鮮奪目的花朵，襯以粉綠色的葉片，鬱金香在花的王國里確是獨樹一幟。在歐美，鬱金香被作為勝利、凱旋、美好的象徵。

鶴望蘭又名天堂鳥花，極樂鳥花，原產南非，是旅人蕉科多年生常綠草本植物，是世界五大名花之一。

鶴望蘭花形奇特、優美，總苞紫色，花萼橙黃色，花瓣天蘭色，形如飛鳥，是一種動感十足

以表達騰飛、自由、幸福快樂和欣欣向榮、繁榮昌盛的感受，即使用一支也有生機勃勃的感覺。

鬱金香有一百餘種，歷經數百年的雜交育種，園藝品種已達一萬左右。鬱金香屬多年生球莖。葉寬如劍，有3至5枚，花單朵，頂生於花莖。株形、花型、花期、瓣型、花色等種類繁多。

自然大地如此壯觀美麗，鮮花如海，草木葳蕤，每到這個季節，整個大地鬱鬱蔥蔥，生機盎然，氣勢不凡。整個大地，田野，山崗，森林，草原，沼澤，湖泊，雪山，海灘。。。。都構築繁盛和美麗。

1949年5月14日，方瑞達誕生在上海之地，曾用名鹿宇，唐海江，昊燁，顧茵，葳蕤，方達，Smith等（筆名別名等），早年曾在世界各國學習研讀科研工作講學商務等，包括歐美俄英法德意日加澳印巴阿拉伯南非等國，足跡遍及全球。他努力學習研讀各國各民族的文化思想，學習各國民族的文明智慧，獲得了極大的成功。他是偉大的自然科學家，物理學家，數理邏輯學家，藥化學家，天文學家，地質學家，生物學家，醫學家，病毒學家，宇宙學家，宇航學家，發明家，建築學家，機械工程專家，精細化學家，同時又是偉大的哲學家，思想家，宗教家學，社會學家，經濟學家，人類學家，考古學家，語言學家，教育家，語言學，文學家，作曲家。方瑞達定律，方瑞達哲學，方瑞達社會學，方瑞達經濟學，方瑞達宇宙學，方瑞達宗教學，方瑞達醫學，方瑞達文學，方瑞達音樂作品等等，方瑞達著作和方瑞達主義，是全人類最重要的寶貴財富精神財富科學財富文化財富。他在整個人類歷史發展中的重要地位和影響力，任何人難以替代難以撼動難以比肩，任何人物和他相比，難免相形見拙。人類歷史千萬年，千萬億人類中能夠出現這樣的偉大人物的確屈指可數。最重要的原因，是他善於學習研究全人類的偉大智慧文明，偉大的自由理性，同時善於科學理性的分析批判，從而獲得勝利輝煌。方瑞達始終秉持崇尚全人類偉大的自由理性主義和全人類偉大的自由和平富裕溫馨社會的福祉，獲得全人類各民族各國億萬億人民的尊敬和熱愛，不論東方西方，也不論南北半球，不論種族信仰宗教語言文化膚色。方瑞達反對和批駁個人神話，他認為任何人物在偉大的自然宇宙面都不過是一半顆微不足道道的粒子塵埃，不論你是偉大或渺小，不論你是高貴或低賤都是如此。一個生命意義的偉大和寶貴，首先在於你能為這個世界和人類提供什麼，而不是這個世和人類給與你什麼賦予你什麼。方瑞達是偉大的世界公民，偉大的世界領袖，國際領袖，全人類80億人民的導師，世界任何人物和他相比

都不成比例。特別當今時代，世界發生翻天覆地的巨變，各種矛盾頻發，各種挑戰增多，世界進入多事之秋，和平發展日益受到各種威脅，甚至包括戰爭或核大戰。全人類和整個世界處於動盪競爭之中，新的世界大戰隱憂再現。在此之際，方瑞達主義更有特別重大的現實意義和歷史意義世界意義。它就像偉大光輝的太陽金光萬道，永遠永遠照耀著廣袤的人類大地和星球世界，永遠永遠照耀著億萬億人的心靈和身軀。

方瑞達研究人類社會發展和演變，他始終把他作為自然的生命動物物種來分析，因而更具有科學理性；方瑞達研究整個人類社會和世界發展歷史，他始終把它當做宇宙之海的一顆砂礫一朵浪花，因而，他的學說和理論可以影響引導全人類幾千年幾萬年幾十萬年幾百萬年，超越跨越時空。

方瑞達最美妙最震撼世人的一名言：一隻手可以輕輕拍起地球，另一隻手又可因輕輕拍落月球，這是上帝賦予大神的鬼斧神功，唯有科學哲學才有此神術之手玩轉星球。作為偉大的自然科學家哲學家宇宙學家，地球彷彿僅僅是一顆小皮球不斷在他手中蹦來蹦去，因為他的視野十分廣闊深邃，一般人卻是難以相比企及。我們許多人和他相比，大概只有他的十分之一或者百分之一，千分之一，十分淺薄，年幼無知，或者說比較稚嫩，在他的偉大海量面前，根本不可相比。人生的生命時間不過 3-4 萬日，要在有限的時間研讀億完本書的確不易。我們的腦容量可能不及他的一半，所有的信息儲存需要巨大容量。方瑞達廢寢忘食，有時會通宵達旦，學習，研究，思考，認真細心進行鑑別診斷，而不是囫圇吞棗，又不求甚解，似懂非懂。他深思熟慮，不斷反思，不會盲從，即使權威大師，也要反復在他腦海裡過濾沉澱才能定奪，不會輕易跪拜在面前人云亦云或者盲目追風跟風。我們不少人，要不讀死書，要不一目十行，沒有心領神會，讀書演說胡編亂造，亦步亦趨，自己沒有靈魂，拼命追求名譽利益，儼然成為權威大師招搖過市，誤導謊騙那些年幼無知的青年和學子，的確害人不淺，被人貽笑大方而不知廉恥。方瑞達對此嗤之以鼻，一再教導青年和學子，善於學習，善於思考，要堅持真理，修正錯誤，才能有所造詣有所成就。有人曾當面對他說，我們幾十個人加在一起，也不抵你的一半。方瑞達笑著回答道：錯了，你們十個人的大腦和能量加起來可以勝過神仙，何況是我呢？我一不是神，二不是魔，你們都是我的老師，各有各的長處，我並不一定都能超過你們。所以，應當拜你們為師，不恥下問，而不要好為人師，處處充當教師爺，好想世界沒有自己天就塌下來，地球就停止轉動了，這是神話。地球上別說少了那麼幾個人，即使沒有了人類，沒有了動植物，地球月球火星木星太陽銀河依然會轉動。個人再偉大再有本事學識，把你放進大黑洞超級星球，你什麼也不是，一顆微粒塵埃也不是。難道這還有什麼疑問嗎？有人稱他為神童，還有人稱他為超天才，世界超人世界偉人，他這樣回復道：我只不過是一個永遠不停勞作的耕夫和工匠罷了。我來到這個世界時候就是一顆微不足道的微粒，當我離別這個世界的時候我仍然不過是一顆微粒而已。世界上唯有太陽黑洞銀河才能成為超星，生命動物人類都不過是微粒塵埃，只不過是有相當的人迷迷惑惑並沒有把自己當做微粒塵埃，反而把自己看成是巨星或是上帝，豈不荒唐可笑？

方瑞達一再鼓勵和教導我們和青年一代，要勤奮讀書循序漸進，又要不斷思考研究紮紮實實，聯繫廣闊的社會實踐，求真務實，才能勝利攀登的高峰。孤陋寡聞，或一知半解，是不能獲得真知的。不要盲目崇拜，要科學理性求真求實，否則，你永遠會停留在半山腰毫無建樹可言。即使你獲得了博士教授頭銜，也不可能清高高傲，依然需要新的學習研究。知識既要廣博，更要專深尖，才能成功。我們銘記他的教悔，永誌不忘。

5 月的鮮花開遍大地，5 月的芬芳香飄萬里。燦爛的太陽普照大地，世界美好而又偉大，一切會欣欣向榮。

聖經有許多名言：

當一扇門為你關閉時，一定有一扇窗為你打開。

“口吐真言，永遠堅立；舌說謊話，只存片時。”

【約 8:32】 你們必曉得真理，真理必叫你們得以自由。

一眼無際的花海山野大地，仿若人間仙境，彩蝶紛飛，蜜蜂起舞，一個個忙碌而又歡快的精靈，在花叢間穿梭往來，處處充滿了一種奔放自由令人沉醉神往的勃勃生機。山坡上綠茵如錦，盛開著鬥艷爭妍的五光十色的鮮花，如同一大片翡翠上鑲著各色各樣的奇寶異石。

5 月的田野，5 月的山林，5 月的花海，5 月的大地。

當然，人們不可陶醉在山野花海之中。

現代社會已進入星球時代，智慧工業革命時代，我們自然不可信而好古，希望世界出現新的造物主救世主，那是十分荒誕不稽幼稚可笑的。因此，需要科學理性主義，現實主義，而不是愚昧主義，虛幻主義主導世界和未來。世界需要自由理性，需要全人類的偉大智慧偉大力量維護和保護。方瑞達和方瑞達主義對於全世全人類至關重大，因為他始終如一引領引導世界 80 億人口經過千難萬險不斷進發，向著自由理性和平富裕溫馨的未來社會勇往直前。

世界是偉大的，人類歷史的發展不會永遠是花香鳥語的天然大花園，需要園丁不斷整理修飾殘枝敗葉才能萬枝千紅永葆青春。

5 月的日子，年年如是，萬世千年，周而復始。今天如此，明天如此，未來如此。幾百年幾千年幾萬年幾百萬年也是如此。美麗的 5 月，燦爛的 5 月，輝煌的 5 月，紀念這個輝煌的日子，美麗的大地，美麗的山野，美麗的世界，美麗的星球。燦爛的星光一望無邊，繽紛的花野到處含笑。

麥迪斯。 L 馬克 編譯 2009 年 5 月 14 日於 初稿溫哥華 墨西哥 2009 年 v.2.2 版
